**논문**

**Directional anisotropy of motion responses in retinotopic cortex.** / Raemackers, Matthijs ; Lankheet, Martin J M ; Moorman, Sanne ; Kourtzi, Zoe ; van Wezel, Richard J A (Human brain mapping, v.30 no.12, pp.3970~3980, 200912)

Recently, evidence has emerged for a radial orientation bias in early visual cortex. These results predict that in early visual cortex a tangential bias should be present for motion direction. We tested this prediction in a human imaging study, using a translating random dot pattern that slowly rotated its motion direction 360° in cycles of 54 s. In addition, polar angle and eccentricity mapping were performed. This allowed the measurement of the BOLD response across the visual representa...

**특허 - 등록**

**Apparatus and methods for imaging using an anatomical positioning system** / Hadley, J, Rock; Parker, Dennis; Burnett, Aaron J. (US-7613494, 20091103)  
 The present invention includes a system that allows for the easy substitution of imaging elements attached to an anatomical positioning device. One or more imaging elements may be mounted to the anatomical positioning device in such a way that the placement of the imaging elements in relation to the anatomical positioning device and the subject can be easily controlled by the operator.

## Model-Free International Stochastic Discount Factors

MIRELA SANDULESCU, FABIO TROJANI, ANDREA VEDOLIN

We provide a theoretical framework to uncover in a model-free way the relationships among international stochastic discount factors (SDFs), stochastic wedges, and financial market structures. Exchange rates are in general different from the ratio of international SDFs in incomplete markets, as captured by a stochastic wedge. We show theoretically that this wedge can be zero in incomplete and integrated markets. Market segmentation breaks the strong link between exchange rates and international SDFs, which helps address salient features of international asset returns while keeping the volatility and cross-country correlation of SDFs at moderate levels.

# Setup your Third Iron account

<https://thirdiron.com/setup>

This form is for new account setups.  
Existing customers please visit: [LibKey setup](#)

## 2 | Library Configuration

Setup is easy, but we need a couple bits of information to customize your account to your environment.

How do you authenticate users for remote/offsite access? \*

EZProxy

Please provide your proxy prefix URL \*

[http://libproxy.kdischool.ac.kr:8002/vn/proxy\\_linking.asp](http://libproxy.kdischool.ac.kr:8002/vn/proxy_linking.asp)

Please make sure your prefix includes a place to pass the target URL in the syntax. For example: <https://libraryproxy.com/login?url=>

Do you require all resources to be proxied? \*

- Yes, please add the proxy to all outbound links  
 No, only apply the proxy if a user is off site (outside the authorized IP range)

Please provide test login credentials to your proxy/PAC for use in trial setup

ID: [TESTLOGIN](#) PW: [XXXXX](#)

Credentials are very helpful in troubleshooting access issues during the setup process. Providing even temporary credentials now helps prevent user-encountered problems during the trial experience.

Is your proxy server configured for: \*

Proxy by domain

[Why does this matter?](#)

Institution IP Ranges including any proxy server(s) \*

210.XXX.XXX.X

Please DO NOT use subnet notation

Ask your IT department to provide your IPs in octet notation, e.g:  
242.234.212.\*  
231.242.221-57  
184.36.24-48.\*

Link to Library Website \*

## EBSCO Full Text Finder (Automatic Sync and Manual Upload)

← Working with your Library Holdings

Automatic Sync (for subscribing libraries)

Third Iron and EBSCO work together to automatically sync holdings for our mutual library customers. If you use EBSCO A-Z or Full Text Finder and would like auto-holdings please contact us at [support@thirdiron.com](mailto:support@thirdiron.com) and we would be happy to coordinate with EBSCO to set this up for you. Note that it takes about a week on average to receive your first file.

Below is information for manually doing this same process in case that is desired for your particular circumstance.

Manual Upload

Subscriptions are setup by using actual library holdings. Third Iron recommends updating these holdings on a quarterly basis or whenever you have a known significant addition/loss of content to your library to help keep your holdings accurate. Updating your holdings typically takes less than five minutes.

Current A-Z System Procedures (If this does not look familiar, please consult the LEGACY instructions further down the page)

In the EBSCO admin, select the "Holdings Management" tab and the options as shown in the screenshot below. These include the following options:

Format: Tab Delimited

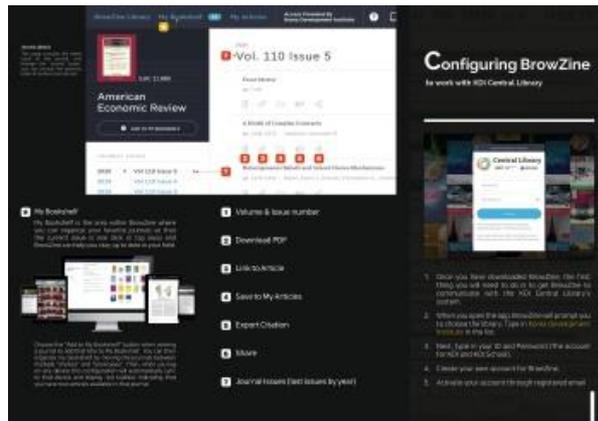

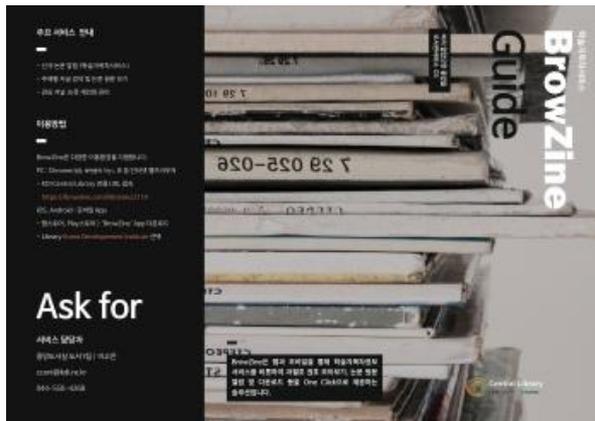

Resources: Managed and Custom

Resource Types: Journal, Newsletter, Report, Proceedings and Newspaper.

### Emerging Markets and the New Geography of Trade: The Effects of Rising Trade Barriers

[Ricardo Reyes-Heroles](#) , [Sharon Traiberman](#) & [Eva Van Leemput](#)

*IMF Economic Review* **68**, 456–508(2020) | [Cite this article](#)

50 Accesses | 5 Altmetric | [Metrics](#)

#### Abstract

Protectionist sentiments have been rising globally in recent years. The consequences of a surge in protectionist measures present policy challenges for emerging markets (EMs), which have become increasingly exposed to global trade. This paper serves two main purposes. First, we collect several stylized facts that characterize EMs' role in the new geography of trade. We focus on differences between advanced economies (AEs) and EMs in trade linkages, production structures, and factor supplies. Second, we build a dynamic, general equilibrium, quantitative trade model featuring multiple countries, sectors, and factors of production. The model is motivated by and geared to jointly match the facts we present. We use the model to estimate the long-run global impacts of rising trade barriers on EMs—both direct impacts and spillovers through third-country effects. Heterogeneity in openness, production structure, trade linkages, and factor supplies leads to large differences between the impacts on AEs versus EMs. We find that variations in both technological comparative advantage and factor supplies play key roles in shaping these differences.
